## JavaScript FAQs

### — What is JavaScript?

JavaScript is a browser-based programming language that makes web pages more responsive and saves round trips to the server.

### — What is jQuery?

jQuery is a library of the JavaScript functions that you're most likely to need as you develop websites.

### — Why is jQuery becoming so popular?

Three reasons:

- It's free.
- It lets you get more done in less time.
- All of its functions are cross-browser compatible.
